Experience

Crawless (2.4 years)   12.2022 - now

Full-stack developer

- Developed and maintained a Directus CRM system. Built new features and maintained the old ones with Vue, Pinia, Express, Postgres
- Was assigned to gradually migrate the backend from Express.js to Nest.js, improving scalability, maintainability, and performance
- Engineered custom Directus extensions for both frontend and backend, extending its core to meet business requirements
- Wrote and maintained unit and end-to-end (E2E) tests for both frontend and backend
- Fixed bugs across both frontend and backend

Zeno Academy (1.8 years)   04.2021 - 12.2022

Front-end developer

- Developed and maintained the educational platform according to FSD methodology using React, TypeScript, and Redux Toolkit
- Enhanced application performance by optimizing React rerenders. Implemented lazy loading. Used memoization techniques
- Built a real-time chat using WebSockets for students and teachers
- Configured the authentication system using JWT
- Implemented ESLint, Prettier, and Husky to improve code quality
- Wrote and maintained unit tests

Education

YURI GAGARIN TECHNICAL COLLEGE   2016 - 2020

Computer Systems and Networks
